Hey, thanks for reviewing my application. I've got some updates I'd like to share.

Since submitting my application, I've been fortunate enough to have been extended a Summer Internship (2023) offer from **Chatham Financial**, a financial firm in Kennett Square, Pennsylvania. The position is in Software Engineering / Development.

I've also begun a (paid) position at the **UD Artificial Intelligence Center of Excellence**, where I'm working with Dr. Pinar Kullu, and Dr. Yao Yu to create an application which can demo their research for peer review. Dr. Yu's project involves analyzing runoff risk in the Great Lakes, and it's implemented using Deep Neural Networks.

My job is to essentially create a website to demo Dr. Yu's project, and in the future, we'd like to provide Dr. Yu's project as a service to the US Government, and agricultural workers across the world.

Again, thank you for reviewing my application, and thanks for considering these updates.

Cheers,
 Jonathan

P.S. I've also uploaded a copy of my resume to the Princeton Applicant Portal.
